CAREER OBJECTIVE

Motivated and hardworking Computer Engineering graduate with a passion for system administration, network management, and IT operations. Seeking an entry-level position where I can apply my academic foundation and technical skills while continuing to learn and grow professionally. Committed to supporting organizational objectives through effective problem-solving, continuous improvement, and dependable IT support.

RESEARCH COMPLETED

Design of a Deep Learning Based Composition Classification System For Abaca Bundle Using Multimodal Imaging Developed a deep learning-based composition classification system for abaca bundles utilizing multimodal imaging techniques, which integrates computer vision and convolutional neural network architectures to automatically analyze and classify fiber composition with high precision and robust generalization across varying environmental conditions.

KNOWLEDGE

As a graduate of Bachelor of Science in Computer Engineering in Technological Institute of the Philippines, my education is grounded as an outcome-based framework. This approach has equipped me to proficiently demonstrate the following competencies essential to the computing profession:

- Analyze complex problems and identify and define the computing requirements appropriate for solution.
- Use Modern techniques and tools of the computing practice in computer activities.
Understand professional, ethical, legal, security and social issues and responsibilities relevant to professional computing

SEMINARS AND TRAINING ATTENDED

- Network Engineering
Technological Institute of the Philippines – Quezon City
August 16, 2025
- Telco Reinvented: Disaggregated, Cloudified, and AI Driven
Technological Institute of the Philippines – Quezon City
August 20, 2025
- Cloud
Technological Institute of the Philippines – Quezon City
August 30, 2025
- DevOps of the Future
Technological Institute of the Philippines – Quezon City
September 13, 2025
- Beyond the Cloud: Bridging Connectivity, Security, and Innovation
Technological Institute of the Philippines – Quezon City
September 13, 2025

- A Day in a Life of a Data Engineer
Technological Institute of the Philippines – Quezon City
September 17, 2025
- AI and Analytics in Action: Tackling Real-World Industry Problems with Smart, Data Driven Innovation
Technological Institute of the Philippines – Quezon City
September 20, 2025
- Marketing for Computer Engineers
Technological Institute of the Philippines – Quezon City
September 20, 2025
- DevOps Application
Technological Institute of the Philippines – Quezon City
September 22, 2025
- Full Stack in Practice: Professional Skills for the Modern Web
Technological Institute of the Philippines – Quezon City
September 27, 2025

OTHER SKILLS

TECHNICAL SKILLS

- Operating Systems: Windows Server, Ubuntu Linux
- Network Administration & Analysis: Wireshark, Cisco Packet Tracer, TCP/IP Fundamentals
- Programming & Scripting: Python, C++, Bash/Shell Scripting
- Automation & Virtualization: Ansible, Oracle VirtualBox
- Design Tools: Figma, CAD Design, Basic 3D Modeling

SOFT SKILLS

- Team Collaboration
- Problem Solving and Troubleshooting
- Time Management
- Communication Skills
- Technical Documentation
- Adaptability and Continuous Learning

RELEVANT TOOLS & TECHNOLOGIES

- Wireshark
- Cisco Packet Tracer
- Ansible
- Oracle VirtualBox
- Figma
- Windows Server
- Ubuntu Linux
- Git/GitHub
